

ADRIANO BHAGASKARA

Informatics Engineering Student | Product Design & UI/UX Enthusiast
adrianobhagaskara@gmail.com | www.behance.net/adrianobhagask | +62 895 1407 0666

OBJECTIVE

Informatics Engineering student with a background in graphic design and digital media, passionate about using technology and design to solve real-world problems. Interested in product development, UI/UX design, and creating meaningful user experiences. Eager to learn, collaborate, and transform ideas into impactful digital solutions through opportunities.

SKILLS

Figma	Adobe Photoshop	User Research	Team Collaboration
UI/UX Design	HTML	Visual Communication	Event Documentation
Graphic Design	CSS	Content Creation	Interaction Design

PROJECTS

TolongIn (Concept Project)

Inspired by my gap-year experience, TolongIn is a platform concept that connects people seeking flexible work opportunities with individuals needing help with everyday tasks. The project explores how technology can lower barriers to employment for people without specialized skills while making local services more accessible. Key Contributions:

- Problem Identification
- User Research
- User Flow Design
- Wireframing
- UI/UX Design

AKIA Building Materials Platform

A digital transformation project aimed at helping traditional building material businesses improve accessibility, product discovery, and customer experience through a modern web platform.

EXPERIENCE

Social Media Graphic Designer, OtakuTalkz & Rawrtime	Jan 2025 - Present
• Created visual content tailored to audience needs and platform requirements, improving communication effectiveness and user engagement. • Developed consistent design templates to strengthen brand identity and audience engagement. • Collaborated with content teams to improve visual communication across social media platforms.	
Publication & Documentations, Various Student & Community Programs	Aug 2025 – Jun 2026
Projects: • Informatics Engineering Student Association Assembly • Digital Literacy Volunteering Program	
Responsibilities: • Produced visual content and managed publications across social media and event channels. • Documented events through photography and media coverage for promotional and archival purposes. • Collaborated with student volunteers to ensure effective event promotion and documentation.	
Creative & Media Division, High School Yearbook	Mar 2024
• Designed visual layouts and graphic elements for the annual school yearbook. • Collaborated with a team to develop a cohesive visual identity and publication design.	

EDUCATION & COURSE

UIN Syarif Hidayatullah Jakarta	2025 – Present
Bachelor of Informatics Engineering • Cumulative GPA: 3.85/4.00	
CS50X: Introduction to Computer Science, Harvard University	2026 – Present

PROJECTS

Kerjaln (Concept Projects)

Inspired by my gap-year experience, Kerjaln is a platform concept that connects people seeking flexible work opportunities with individuals needing help with everyday tasks. The project explores how technology can lower barriers to employment for people without specialized skills while making local services more accessible.
